

THE GATE

AI-Enhanced Property Campaign Concept

PRIVATE FUNDING-FOCUSED CASE STUDY · KREO STUDIO

A private speculative concept study based on a high-value Chelsea Square listing.

Private proof-of-work document. Not for public distribution.

Prepared for: The Cube / University of Plymouth Enterprise Support

The Entrance · Arrival

01 — Project Snapshot

Sector	Luxury property / architecture marketing
Type	Private speculative proof-of-concept
Location Context	Chelsea Square, SW3
Output	Teaser film · Campaign stills · Pitch sheet · Preview page · Outreach package
Tools	Photoshop · Runway · ComfyUI · Topaz · After Effects / Premiere · ChatGPT · Claude · Gemini
Role	Independent creator / designer / AI visual producer
Status	Private · Watermarked · Not publicly distributed

02 — The Challenge

High-value property listings often rely heavily on static photography and brochure assets, even when the property has a strong emotional story. The challenge was to explore how a luxury property could be transformed into a cinematic, emotionally engaging campaign experience using design, AI-enhanced motion, sound, and storytelling.

This challenge points to a larger market opportunity: high-value clients who deserve more than static assets, and a growing gap between what traditional agencies deliver and what AI-enhanced studios can now produce independently.

03 — The Concept

THE GATE

The campaign was built around one defining detail: the property sits directly opposite a communal garden gate — a rare and private amenity in one of London's most prestigious addresses.

The gate became the conceptual anchor:

Arrival. Privacy. Access. Legacy. Threshold. Next chapter.

Rather than leading with square footage and specification, the campaign leads with feeling. This is the kind of narrative thinking that separates a campaign from a brochure.

Property facts:

- Guide price: £11.5m
- Approx. 4,822 sq ft including garage and vaults
- Freehold · Same family ownership for over 50 years
- Considerable scope to extend and alter
- Positioned directly opposite communal garden gate, Chelsea Square, SW3

04 — What Was Produced

Working independently, KREO Studio produced the following as a private proof-of-concept:

- Short watermarked teaser film
- Three cinematic still campaign frames
- One-page private pitch sheet
- Password-protected private preview page
- Campaign copy and positioning
- Sound direction
- Outreach email and phone script
- Client delivery plan

This project was produced independently, demonstrating end-to-end capability across research, design direction, AI video production, editing, sound direction, pitch packaging and client outreach.

05 — Campaign Stills

The Entrance · Arrival

Principal Reception · Proportion & Light

Communal Gardens · The View Beyond

Private watermarked assets. Not for public distribution.

06 — Process Overview

The following steps were completed independently, without external creative direction or agency brief:

01 — Research & Opportunity Identification

Identifying a suitable high-value listing and assessing its campaign potential.

02 — Property Facts & Buyer Psychology

Understanding what makes this property emotionally compelling beyond its specification.

03 — Visual Direction & Campaign Concept

Developing a clear creative direction — tone, colour, typography, narrative positioning.

04 — AI Motion Testing & Production

Producing AI-enhanced motion sequences to build atmosphere and cinematic quality.

05 — Edit, Typography & Sound Direction

Assembling the teaser with considered editorial pacing and audio mood.

06 — Pitch Sheet & Private Preview Delivery

Packaging the work into a professional, shareable format for a private client conversation.

07 — Outreach to Relevant Contact

Creating and sending a professional outreach package to the relevant agent contact.

Each stage was completed by a single independent creator. No agency. No brief. No budget.

07 — Responsible AI Approach

- AI was used to enhance presentation and atmosphere — not to mislead or misrepresent the property
- All teaser content remains private and watermarked
- No public distribution has occurred without consent
- No claim of official commission or vendor approval is made
- Future visualisation work will be clearly labelled where AI has been used
- The property's architecture and identity remain truthful throughout

Responsible AI use is a core part of KREO Studio's value proposition. As AI visual production becomes more common, clients need to trust that their creative partners are using these tools with integrity. That trust is built now, from the beginning.

08 — Commercial Potential

Who this serves:

Estate agents · Property developers · Architects · Interior designers · Luxury brands · Student accommodation developers · Private landlords · Premium hospitality · Local and national property businesses

Service tiers (indicative):

Tier	Description
Starter Proof-of-Concept	Core teaser film + campaign stills + pitch sheet
Full Cinematic Campaign	Extended teaser · Multi-scene edit · Sound design · Social versions
Premium Campaign & Visualisation	Full package + private preview page + outreach assets + investor deck

The market for this type of work exists and is growing. AI-enhanced creative production is no longer experimental — it is increasingly expected at the premium end of property and brand marketing.

09 — What Funding Would Unlock

KREO Studio has already proven the concept. Funding would accelerate the execution.

Hardware & Production

- New GPU for faster local AI video generation
- Upgraded workstation processor
- Professional colour-accurate monitor
- Drawing tablet and input hardware
- External storage and backup systems

Software & Cloud

- AI software licences and subscriptions
- Cloud rendering and GPU credits
- Hosting and private preview infrastructure

Studio & Operations

- Professional printing and print testing

- Legal templates and licence agreements
- Art studio workspace setup

Growth & Outreach

- Marketing materials and outreach campaigns
- Future case studies and pilot projects
- Improved client presentation systems

Each item directly improves the quality, speed, or professionalism of KREO Studio's output — and therefore its ability to win and deliver commercial work.

10 — Founder Capability

Brandon Allen · Creative Director, KREO Studio

Brandon is a UK-based multidisciplinary graphic designer and AI creative technologist, currently studying Graphic Design in Plymouth.

Originally from Manchester, where he lived for 25 years before relocating to Plymouth. Holds a full UK driving licence.

Brandon developed strong computer discipline from a young age, building a long-term foundation in Photoshop, design, motion, and creative technology. He is now applying that foundation to AI-enhanced visual production — combining traditional design craft with emerging tools to produce commercial-quality work independently.

KREO Studio is his vehicle for building a future-facing design and AI visual production studio — one that can serve clients at a professional level from day one, and scale with the right support.

11 — Why This Matters for Enterprise Support

This is not a speculative pitch. It is evidence.

KREO Studio has already:

- Identified a real commercial opportunity
- Researched and understood the target market
- Produced professional-quality campaign assets independently
- Built a responsible, considered approach to AI production
- Created client-ready deliverables: preview pages, pitch sheets, outreach materials
- Demonstrated the ability to take a project from concept to delivery without external support

The right funding and enterprise support would help KREO Studio produce higher quality assets faster, serve clients more professionally, and develop a repeatable, scalable commercial service.

This aligns design, technology and entrepreneurship — and represents a strong student enterprise opportunity with a clear path to commercial viability.

12 — Next Steps

1. Refine the case study and service offer
2. Develop 2–3 additional pilot projects across property, architecture and premium brands
3. Formalise service packages and pricing structure
4. Apply for University of Plymouth / The Cube enterprise support
5. Approach property, architecture and premium brand clients
6. Build KREO Studio into a scalable AI visual production studio
